Dear

Being bitten, slashed or receiving jabs from hypodermic needles are hazards faced by many providing security services. We've worked with the Police and relevant Government bodies to develop the ultimate in hand protection – ProtectorGlove – made with the state of the art, scientifically acclaimed SuperFabric® material from the USA.

By wearing ProtectorGlove, personnel can significantly reduce exposure to injury – and avoid acute anxiety and distress regarding contracting HIV, Hepatitis and other blood borne diseases from needlestick injuries, blades and bites.

ProtectorGlove has the highest standardised CE test rating for abrasion and blade cut resistance levels. And it's machine washable, breathable and flexible. Meadows Health & Safety sourced US SuperFabric® material in order to give ProtectorGlove high levels of puncture, cut and abrasion protection, although the material is not cut or puncture proof. This glove has unrivalled grip, dexterity, areas and levels of protection.

ProtectorGlove is already causing a storm of interest across the Police Force and Prison Service, simply because this combined level of protection, dexterity and grip has not been available before. To get your hands on a pair of ProtectorGloves call our sales team today on **01594 822 575**, we look forward to your call.

Yours sincerely,

D. M. Taylor

Managing Director
